Project design phase - I Solution Architecture

Date	01-11-2022
Team ID	PNT2022TMID32010
Project Name	Estimate the crop yield using Data Analysis

Download the dataset for the project in the This dataset must be uploaded to cognos in order to Cleaning or pre-processing of data must be carried out with the help of data modules This dataset must be explored with the help of cognos to find out various trends in it Finally, with the help of the trends explored estimate the crop yield based on various factors
